Welcome to the FPL Product Catalogue

Providing quality, British made products since 1991...

Freight Products first opened for business in 1991 and since then has become the largest UK based manufacturer of marker boards as well as leading the field in the production of load restraint, ratchet and webbing products.

In line with the latest legislation, we have expanded our product offering and expertise further to encompass Chapter 8 requirements helping to keep you safe and visible on the highway.

In addition to our core range, we offer a wide range of specialist warning and conspicuity products including, ECE-104, cameras, directional warnings, chevron kits and battenburg markings.

For more information and latest updates to legislations check our website and sign up for mailers and newsletters at www.fpluk.com

INTRODUCING MARKER BOARDS

MARKER BOARDS

From Freight
Products UK Ltd

**Custom
printed boards:
add your logo
for FREE**

FPL ARE THE LARGEST MANUFACTURER OF CV MARKER BOARDS IN THE UK. The range includes ECE70, ECE70/1 and BS AU152 approved boards which are all made in the UK.

We offer the facility to include customer logos, all boards are custom printed and you can have your logo added FOR FREE.

We also supply ADR and hazchem markers and panels, abnormal load markers and a wide range of specialist warning markers and signage.

We welcome any customer enquiries for special items and can also supply products for the Irish and continental markets.

In addition to marker boards we also have ECE-104 conspicuity tape available in red, amber and white from manufacturers such as 3M and Avery.

The GHS is an acronym for The Globally Harmonized System of Classification and Labelling of Chemicals.

The GHS is a system for standardising and harmonising the classification and labelling of chemicals. It is a logical and comprehensive approach to:

- Defining health, physical and environmental hazards of chemicals;
- Creating classification processes that use available data on chemicals for comparison with the defined hazard criteria; and
- Communicating hazard information, as well as protective measures, on labels and Safety Data Sheets (SDS).

For more information on this legislation, which came into effect in the UK & European Economic Area on 20th January 2009, please visit;

www.unece.org/trans/welcome.html

ECE-104 REFLECTIVE TAPES

3M Science.
Applied to Life.™

Know it's genuine.

Don't take chances with safety. Be sure to use genuine 3M™ Conspicuity Markings.

For performance, quality and durability you expect, make sure you are using genuine 3M™ Conspicuity Markings by following the 3M Safe Guard™ Process:

- Find the codes on the label on the beginning of the roll.
- Enter the codes at 3M.com/SafeGuard or scan the QR code. A green checkmark means the product is genuine.
- Mark the roll as validated with initials and date.

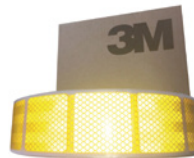

Learn more at 3M.com/SafeGuard.

ECE-104 Conspicuity Tape Application

When using ECE-104 conspicuity tape, the following contour marking requirements should be observed for trucks exceeding 7.5 tons (N2 and N3) and trailers exceeding 3.5 tons (O3 and O4).

SIDES	UPPER ELEMENTS	LOWER ELEMENTS	LINE MARKING	REAR
Full or partial contour marking required. Conspicuity marking must be as close as possible to the edge of the vehicle and reach within 600mm of the ends. The cumulative length should also equate to 80% of the overall length of the vehicle, excluding the length of the cab for motor vehicles and drawbar for trailers.	As high as possible, but within 400mm of the upper extremity of the vehicle. For partial contour markings, each upper corner shall be described by two lines at 90 degrees of each other and at least 250mm in length.	As low as possible, but within a range of not less than 250mm above ground and not more than 1500mm high.	Permitted where the shape, structure, design or operation requirements make it impossible to comply with the mandatory guides.	Full contour marking required. Only red or amber can be used. Conspicuity marking must be as close as possible to the edge of the vehicle. The cumulative length should also equate to 80% of the overall width of the vehicle, including marker boards.

RECOMMENDED COLOURS:

Front - White
Sides - Amber or White
Rear - Red or Amber

White reflective markings are not permitted on the rear of vehicles.

ECE-104 Approved Products

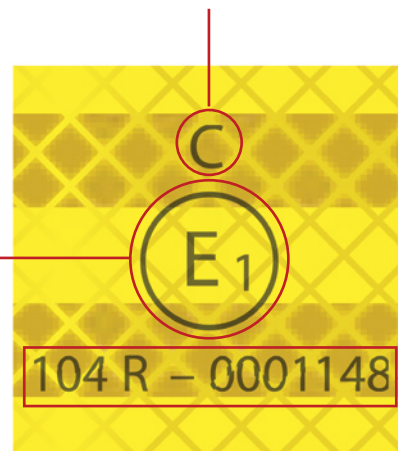

3M provides reflective tapes that are classified as C-class (maximum brightness) as defined by regulation ECE-104, in formats suitable for curtain sided, rigid vehicles and tankers. Designed for ease of application and durability. Supported by **3M Safe Guard**

Avery Dennison V6700 & V6750 series Conspicuity Tapes for rigid & curtain sided vehicles provide superior reflectivity and enhanced night-time safety. Both meet or exceed the requirements of 104 Class C materials including colour fastness, weather resistance, cleaning & penetration of water.

Custom Printed Conspicuity Tape

Logo conspicuity tape offers the same great safety advantages as traditional conspicuity tape, with the additional benefit of promoting your company logo.

Logo conspicuity tape is available in white, yellow and red, and can easily be produced to include your company logo. Its durable prismatic lens structure increases the visibility of marked vehicles and meets ECE standards.

What's more, it's easy to do. Submit your logo or icon and get an e-proof for approval within a week. MOQ applies. With our logo conspicuity tape, you will boost brand awareness through your company fleet vehicles, all while complying with regulatory requirements.

Please contact us for further details.

Chapter 8 & Highways

A wide range of products to ensure your full compliance to the stipulations of the Traffic Signs Manual for road and street works.

**ALL CHAPTER 8 KITS
ARE TEMPLATED AND
MANUFACTURED BY**

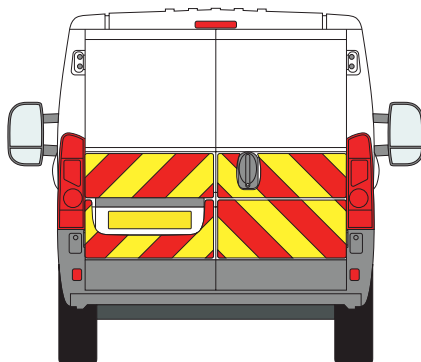

Popular Models Include:

Ford Transit Connect Half Kit

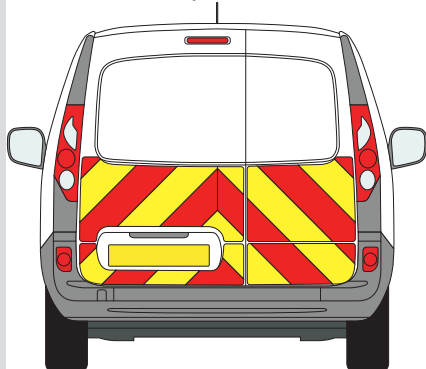

Peugeot Boxer Half Kit

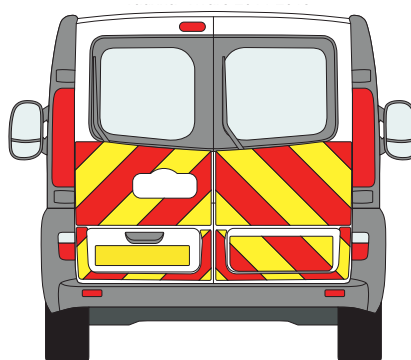

Ford Transit High Roof

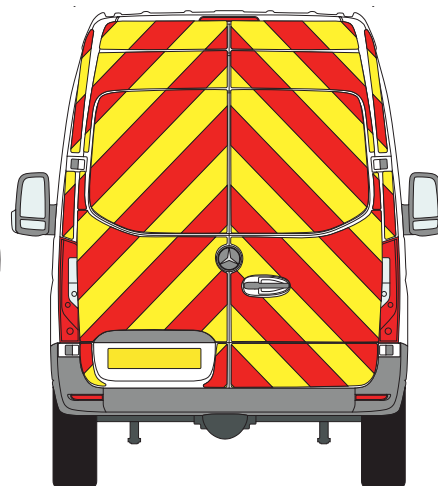

Renault Kangoo Half Kit

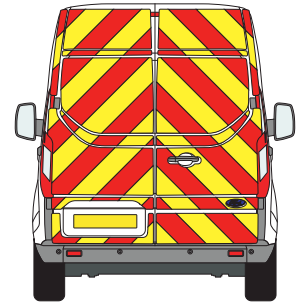

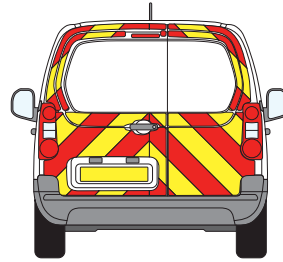

Vauxhall Vivaro Half Kit

Mercedes Sprinter High Roof

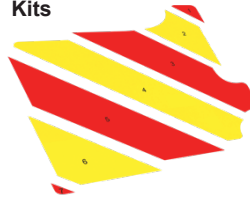

Chapter 8 Approved Chevron Kits

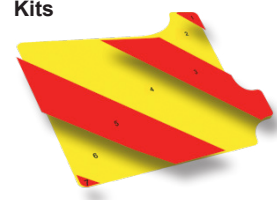

- Half kits
- Full kits
- Without windows
- Standard strip kits
- Flooded kits
- Fitting option available
- Engineering grade
- Edge Sealed micro prismatic
- New vehicles added regularly

Standard Strip Kits

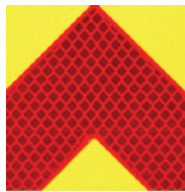

Flooded Kits

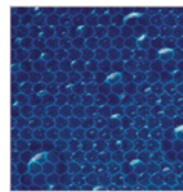

Engineering Grade Chevron Kits

These kits are a combination of yellow fluorescent non-reflective material and a reflective red that primarily uses crushed glass beads for reflectivity. These kits are the most cost-effective.

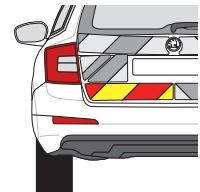

Prismatic Grade Chevron Kits

The red material used has a far higher reflectivity value compared to engineering grade and is known as the 'gold standard' by the highways and civil engineering industries covered by Chapter 8.

Edge-Sealing of Prismatic material

In order to ensure the maximum life span of your conspicuity markings (up to 10 years), we edge seal layered micro-prismatic material with an ultra-sonic weld during the cutting process.

Replacement Panel Service

If you have purchased a kit from FPL and your vehicle is involved in a minor collision you can choose to order only the panels of a kit that were damaged, saving time and money during repairs and downtime.

Chevron Kits • Chapter 8 Compliant • Emergency Services Options

Emergency service battenburg kits also available

In addition to a large stock profile, we can offer chevron kits in engineering and Micro-Prismatic materials from 3M, Avery Dennison and Rennicks Nikkalite.

Magnetic Chevron Kits also available

AIR COILS

Our air coils are manufactured in Europe using premium quality Polyurethane or Polyamide which offers long working length, high tensile elasticity and offers better resistance against oil, ozone and UV. They are highly flexible at low temperatures and have very good abrasion and rupture resistance (no fracture at the connections).

TECHNICAL: Manufactured in accordance with DIN 73378, 74324-1, 74323, 74310, ISO TR 7628/2-1986 (E) ISO/FDIS 7375-2:1998 (E).

Working pressure 10 BAR Bursting pressure 42 BAR @ 20°C.

- Complies with ADR requirements

PART NUMBER: FE6KGDP

9KG Dry Powder Extinguisher

- 9KG ABC dry powder fire extinguisher
- Complies with ADR requirements

PART NUMBER: FE9KGDP

1L Foam Extinguisher

- 1L AFFF foam fire extinguisher
- Compact size ideal for home, office and car
- Supplied with mounting bracket

PART NUMBER: FE1LTFOAM

2L Foam Extinguisher

- 2L AFFF foam fire extinguisher
- Supplied with transport bracket

PART NUMBER: FE2LTFOAM

HOLDERS & FIRST AID

6KG Top Loading Fire Extinguisher Box Holder

- Strong durable design & lightweight
- For 6KG Fire Extinguishers Truck & trailer mounting
- Fully recyclable, chemical resistant, UV-stabilized PE
- Internal tension strap helps prevent movement by the cylinder
- Plastic toggle, lynch pin and hinge pins as standard
- Flat back for ease of mounting

PART NUMBER: FIREBOX6KGTL

9KG - 12KG Top Loading Fire Extinguisher Box Holder

- Strong durable design & lightweight
- For 9-12KG fire extinguishers up to 180 / 230 mm Ø
- Truck & trailer mounting
- Fully recyclable, chemical resistant, UV-stabilised PE
- Internal tension strap helps prevent movement by the cylinder
- Plastic toggle, lynch pin and hinge pins as standard
- Flat back for ease of mounting

PART NUMBER: FIREBOX9-12KGTL

Passenger Carrying Vehicle First Aid Kits

- Every PCV must have a first aid kit.
- These kits comply to the Road Traffic Regulations and will cope with minor injuries.
- Supplied complete with bracket

WHEEL NUT INDICATORS & TORQUE CLIPS

Wheel Nut Indicators (WNI) are a visual safety aid to highlight loosening wheel nuts. They give the driver an early indication that the wheel nuts need to be addressed. Wheel nut indicators are used extensively by the transport industry to enhance fleet safety.

APPLICATION: The WNI is applied to the wheel nut by gripping the six corners of the hexagon nut with the WNI teeth and positioned in alignment with each other in a recognized pattern and fitted in a way that the WNI is allowed to rotate freely should the wheel nut become loose, this is normally anti clockwise direction. When a wheel nut becomes loose the WNI will turn with the nut and break the pattern visibly identifying a safety hazard. The wheel nut must be torqued to the recommended value before fitting the WNI and checked in accordance with CPC legislation and a qualified CPC driver and should be of a tight fit.

WNI also provide an indication of overheating wheels, which is not always obvious to see, this can be the result of brakes sticking or problems with the bearings, WNI are designed with **predetermined melting points** to draw attention towards a problem which needs to be addressed before it becomes serious.

WNI provide a clear visual commitment to road worthiness and professionalism to other road users, showing further commitment to health and safety, road and transportation associations such as VOSA, HSE, RHA and FTA.

Temperature

The standard WNI material has a melting point of 125°C and our high temperature nylon material is available to order subject to minimum order quantity and can withstand temperatures up to 240°C.

Material

WNI are manufactured in the highest quality impact copolymer polypropylene offering high stiffness and good impact resistance properties and are resistant to moisture/ water, road salt, oil and detergents.

ABOUT WEBBING

HIGH PERFORMANCE TOP SELLING RATCHET STRAPS

All FPL strapping and load securing equipment is manufactured to European standard.

WELDED CLAW HOOKS

Manufactured to resist
splaying under tension

HEAVY DUTY STITCHING

To resist stitch tension failure

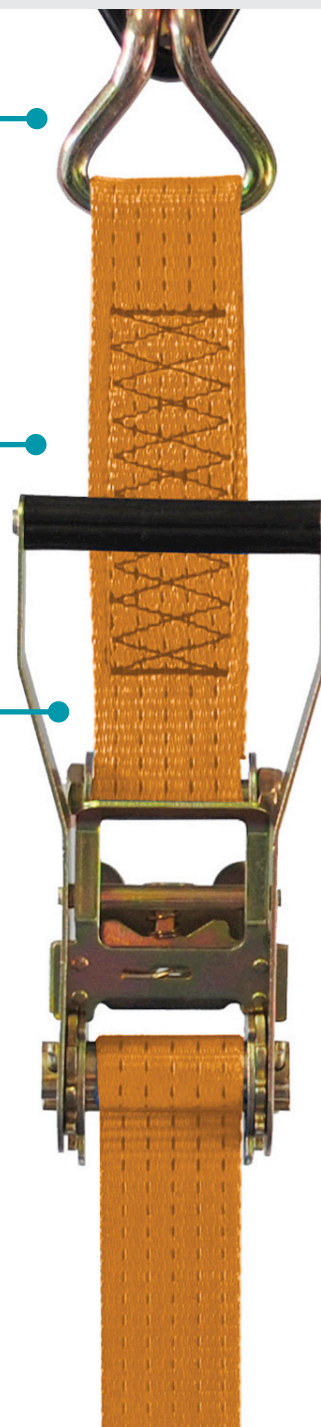

LABELS

Tear resistant heavy duty labelling
sewn into each section of the strap.

Shows all the information required
by EN12195-2:2001 including
the lashing and breaking force,
batch information and more

DOUBLE SPROCKET

For strength and durability in even
the harshest weather conditions

ARE YOU COMPLIANT?

All of our straps and webbing comply with or exceed current European standards thereby eliminating the possibility of claims arising from using noncompliant products.

NEW WEBBING COLOURS NOW AVAILABLE

Brighten up your loads a choice of additional colours, MOQ's apply.

Pallet Edge Protectors

Pallet edge protectors are an ideal way to ensure your cargo is kept safe, secure and damage free whilst in transit, plus they extend the life of your straps.

- Plastic edge protectors can be used with 50mm and 75mm webbing
- Protects webbing from sharp and abrasive edges - extending strap life
- An opening in the strap slot enables retro fitting of the corner protectors
- Helps to secure your load more safely

Using edge protectors distributes the pressure of straps more evenly resulting in:

- Reduced strap marks on cargo
- Reduced damage from straps squeezing and damaging packaging
- Reduced damage to straps

PART NUMBER: PCP50/70

LIFTING SLINGS

Lifting Slings

The following slings are manufactured in accordance with EN 1492:200. They are colour coded to help with strength identification and all slings are manufactured to give a safety factor of 7:1. Each sling is individually numbered for full traceability and come with a certificate of conformity. The label attached also includes date of manufacture, CE mark and other important material information.

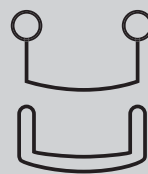

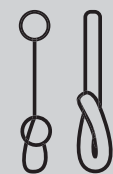

Guide to Safe Lifting with Slings

Correct sling selection is an important consideration when planning your lift. The working load limit (WLL) changes depending on the lifting method you choose. The table below shows the mode factor of various lifts and the resulting WLL.

REMEMBER

Lifting should not be carried out by anyone who is not suitably qualified or not familiar with the lifting techniques and regulations surrounding a lift.

LIFTING METHOD:	STRAIGHT LIFT	CHOKE HITCH	BASKET LIFT 0° - 7°	BASKET LIFT 7° - 45°	BASKET LIFT 45° - 60°
MODE FACTOR:	1.00	0.8	2	1.4	1

INTRODUCTION TO LIGHTING

Lighting and Beacons

The range includes beacons and lightbars with ECE-R10 and ECE-R65 approval to ensure compliance.

INTRODUCTION TO LIGHTING REGULATIONS

Chapter 8 of the Traffic Signs Manual was created to ensure the safety of contractors using highways and motorways for road works and temporary situations by the Department For Transport & Highway Agency. Minimum legal requirements cover “High Visibility” markings and specialist vehicle lighting.

LIGHTING

Part 2, Section O5.3 covers lighting and states any vehicle stopping on the highway for works purposes or inspections shall be equipped with either a roof-mounted flashing amber warning light bar (comprising at least two independent light sources) or two independent roof-mounted flashing amber warning beacons, visible through 360°.

Roof-mounted flashing amber warning beacons must comply with the requirements of the Road Vehicle Lighting Regulations and should also comply with the United Nations Economic Commission for Europe (UNECE) Regulation 65 (R65) on Special Warning Lamps.

ECE LIGHTING REGULATIONS EXPLAINED

- R10 R10 regulation (Plant):**
ECE-R10 approval confirms that the product meets European approval for Electromagnetic Compatibility. All vehicle warning lights are required to have this approval or the earlier EC directives 2004/104/EC or 2006/28/EC as a minimum.
- R65 R65 regulation (Chapter 8 compliant):**
ECE-R65 approval is a higher standard which applies to vehicle warning systems such as lightbars and beacons to ensure compliance with a range of key measurements in terms of light output and environmental performance.

In the rest of Europe it is mandatory that all working vehicles are fitted with ECE-R65 approved products. In the UK this requirement is currently non-mandatory but it is recommended under the Chapter 8 section of the Traffic Signs Manual.

Square Worklamp

- 1000 Lumens

MANOEUVRING ALERTS

SIDEMINDER SYSTEMS AND ALARMALITE

There are over 400 people killed every year throughout Europe from near-side turning collisions.

Typically these accidents occur at side road junctions or roundabouts. These accidents can easily be avoided with the new **SIDEMINDER** and **ALARMALITE** Systems which provide voice activated warnings when a vehicle is turning left.

The **SIDEMINDER** System comes as a single unit which is ideal for smaller lorries or as a complete system for larger vehicles with a master and two slave speaker units, as well as a complete wiring harness to connect the units together. Both units are activated when the indicators are in operation.

The **SIDEMINDER** System is quick and easy to install and designed to protect those around the vehicle! For noise sensitive areas, the **SIDEMINDER** System has a night silent function which can be wired through the sidelights or a switch on the dashboard. The unit knows when the hazard lights are in operation and automatically mutes.

The increase in cycling, especially in our cities and towns and the problems of "blind spot" hazards with heavy vehicles turning, has resulted in the number of deaths increasing significantly. There have been many attempts at solutions, nearly all of which alert the driver, NOT the cyclist or pedestrian, which seems ludicrous as they are the ones in danger.

However we have also discovered that on building sites, pedestrians wear ear defenders, cyclists on the road listen to music with earphones, which also reduces their concentration on their surroundings.

The Patent Pending Indicator **ALARMALIGHT** is designed to address all of these problems. Among its unique features are:

- **Flashing LED lights to attract the attention of the cyclist, pedestrian or in fact deaf person or the hard of hearing**
- **The ability to go significantly quieter at night to compensate for the reduced traffic noise, to be environmentally friendly**
- **Universal fit for any vehicle**
- **Automatically switches off if hazard lights are in operation**
- **Can have any message in any language programmed into it**
- **Possible insurance reduction thereby making the system the most cost effective on the market**
- **Male or female voice**

VOLTS	dB LEVEL	FREQ	CURRENT	HxWxD	FIXING
12-24	85	Speech	0.5 mA		

Sideminder System

- Complete system, master unit + 2 slaves and wiring harness.
- UK Spec – LEFT TURN
- CE & EMC marked
- Epoxy sealed for greater durability against water and vibration
- M.I.R.A. Tested for all on and off Highway applications
- Pressure washable IP67
- Night silent through side lights or on dash switch
- Automatically mutes when hazards are in operation to avoid confusion and noise pollution
- Completely sealed harness with amp superseal connectors

Suitable for:

- Trucks
- Coaches
- Buses
- Rigid bodies
- Articulated trailers

PART NUMBER:

AVSM15CLH

Stud Connector Reversing Alarm

- 102db Dual voltage reversing alarm.
- Speed Fit chassis earth connection plate
- Fully weatherproof and polarity protected.

MANOEUVRING ALERTS

Left Turn Alarmalite

- Probably the most environmentally friendly system on the market.
- 2 Pod orange LED left turn indicator alarm
- The LED lights flash in a manner specifically designed to attract maximum attention.
- Dual voltage
- CE and EMC approved
- M.I.R.A. tested for all on and off highway applications
- Epoxy sealed for greater durability against water
- Complete with anti-vibration gasket and mounting screws
- E marked – e11*72/245*2009/19*7568*00
- 10R approved – 10R-037568

Suitable for:

- Trucks
- Vans
- Utility Vehicles

PART NUMBER:

AVAL2-14CLHO

Left Turn Alarmalite v2

The latest version of the unique Indicator Alarmalight where one of the lights is directed down the “blind side” of the vehicle to enhance the warning.

This 2 pod orange LED left turn indicator alarm unit has been developed at the request of some National Transport Departments in a variety of European countries.

- Dual voltage
- CE and EMC approved
- M.I.R.A. tested for all on and off highway applications
- Epoxy sealed for greater durability against water
- Complete with anti-vibration gasket and mounting screws
- E marked – e11*72/245*2009/19*7568*00
- 10R approved – 10R-037568

Suitable for:

- Trucks
- Vans
- Utility Vehicles

PART NUMBER:

AVAL3-14CLHO

Left Turn Alarm

- Single unit ideal for small vehicles where 1 alarm will suffice.
- UK Spec – LEFT TURN
- CE & EMC marked
- Epoxy sealed for greater durability against water and vibration
- M.I.R.A. Tested for all on and off Highway applications
- Pressure washable IP67
- Night silent through side lights or on dash switch.
- Automatically mutes when hazards are in operation to avoid confusion and noise pollution.

VOLTS	dB LEVEL	FREQ	CURRENT
12-24	85	Speech	0.5 mA

Suitable for:

- Trucks
- Coaches
- Buses
- Rigid bodies

DASH CAMS

**"PLUG AND PLAY" DASH CAMS WITH
12 MONTH WARRANTY**

SMARTVUE DASH CAM HD PRO

The perfect eyewitness, this dash cam delivers high quality video footage with an incredible 170° field of vision

Display	3.0" TFT LCD Display
Camera	12.0MP with A+ grade Super Vision 6G lens
Viewing angle	170° Ultra wide-angle
Resolution	Real FHD 1080P 1920x1080
Memory card	4GB-32GB

PART NO: DC-3.0

SMARTVUE DASH CAM

Record your journeys, protect against insurance fraud and settle disputes with this basic yet powerful dash cam

Display	2.5" TFT LCD Display
Camera	3.0MP with A+ grade 6G lens
Viewing angle	120° Wide-angle
Resolution	Real HD 720P 1080x720, 1080P 1920x1080
Memory card	4GB-32GB

PART NO: DC-2.5

FREE POS DISPLAY STAND

In support of stock order we will provide a counter top display stand FOC with dummy units

For more details please contact FPL

Valeting

Super Flow Brush

- Hand held water fed
- Cleans faster & easier
- Standard quick fix hose connector
- Soft feathered bristle tips ensure safe cleaning
- Cushioned grip insulates & protects from water run off

PART NUMBER: WS.PROHB

Commercial Telescopic Brush

- Strong metal screw fitting
- Quality metal poles
- 1.7 Metres in length
- Soft bristle wash head
- 2 Yellow gripping points
- Ideal for commercial use
- Attaches to standard garden hoses

PART NUMBER: WS.PROWBMED

Heavy Duty Flow Through Commercial Brush

- Ultra strong metal shroud screw fitting for extra support
- 2.5 Metres fully extended
- 10 Inch bi-level head
- Super soft feather tipped split bristles
- 3 Way water control switch
- Steel reinforced tip
- Attaches to standard garden hoses

PART NUMBER: WS.CFB7

Commercial Telescopic Truck Brush

- Strong metal screw fitting
- Quality metal poles
- Special reinforced 3 metre pole
- Extra large 13 inch soft bristle wash head
- 2 Black gripping points
- Ideal for commercial use
- Attaches to standard garden hose

PART NUMBER: WS.PROWBTRUCK

Visit our website for the latest company news and information on new products and promotions.

email your order:

email: sales@freightproducts.co.uk

APPROVAL SYMBOLS

CE MARK

This mark is a self-certification, rather than a test mark and confirms that the product meets the requirements of the applicable EC directives and regulations. The mark may be placed on the product itself or anywhere on the packaging.

ECE-R65: 'E' MARK

This mark shows that the lamp meets the requirements of ECE Regulation 65. These tests cover the flash rate, flash intensity and dispersion as well as the reliability and water resistance of the product. For more information on this certification, contact us.

EMC: 'E' MARK

This mark confirms that the lamp has been tested for electro-magnetic compatibility (EMC) and complies. These tests are carried out against either EC Directive 2004/104/EC, 2006/28/EC or ECE Reg. 10 legislation. All warning lights require it.

10R 01 0000

CAP 168

Although there is no specific product marking, you will find the term above displayed next to items that have been certified to meet the regulations on aerodrome licensing. These are set out by the Civil Aviation Authority and ensure that the device is safe for use on airports or airside areas. This marking comprises mostly of static flash products.

TERMS & CONDITIONS SUMMARY

Payment

30 days nett (account customers only)

Title

Title in goods does not pass until payment is received in full

VAT

Currently charged at 20%

Carriage

Paid on orders over £250.00 nett order value unless agreed otherwise. There is a £12.50 carriage charge under this level applied.

Descriptions, illustrations, images and specifications:

This catalogue was correct at the time of going to print. However due to the continuous nature of product development the right is reserved to change the specification of the items, illustrations and descriptions in this publication at any time.

FPLUK Customer Returns Policy

1. Customers must notify us to request the return of any goods clearly stating the reason for the return request. This can be by phone or email (sales@freightproducts.co.uk) to the sales office or direct to the sales manager responsible for the customer. If there is a genuine reason for the return (i.e. wrong product sent, items faulty or damaged, wrong product ordered but items are re-saleable) then a returns number from FPL together with a returns collection form will be issued. This number will be unique for that particular return and will enable identification of the customer and the products to be returned.

Products returned without quoting this returns number will not be authorised and the goods will not be eligible for credit or FOC replacement. Please note that returns of items which are not faulty or incorrectly supplied will incur a 20% restocking fee.

2. Items manufactured to order and supplied correctly will not be eligible for return. Items requiring modification due to customer error will incur a modification charge.

3. If electrical items fail within the guarantee period we reserve the

right to repair the product and return rather than replace the item foc.

4. When the return arrives at the FPL warehouse it will be checked off against the returns form and any discrepancies noted. If the items returned are damaged or do not match the returns form then the customer will be notified stating the return is not as notified and a credit note may not be issued.

5. If the returned items match the authorised returns request and if new are in re-saleable condition a credit note or will be issued less any restocking fees (if incurred).
